

# Management System Policy

The main activity of **TMR Plastics** is the production of technical parts by injection moulded methods along with assembly.

For parts which we produce and the provision of services related to the production and assembly of medical devices we apply modern production lines and we offer our partners integrated solutions, supporting customer projects in achieving the highest value.

**TMR Plastics** focuses on sustainable production. We are taking care of the environment in a structural way and consider it as our important task to protect and safeguard our world for the next generations.

**It is our goal to supply products and services on time and fully meet the quality, environmental and health and safety requirements, especially legal requirements and expectations of our customers, and to constantly aspiration for customer satisfaction.**

## Company mission

To realize this we:

- Particularly care about cooperation with customers, employees and suppliers to improve results,
- Sustainability and create opportunities which secure the company's future and by this we take care about wellbeing of our people and inspiring innovative work,
- Focus on productivity, continuous improvement including of products and the effectiveness and efficiency of processes and integrated management system, as well as focused on preventive quality and taking into account the context in which we operate and the analysis of risks and opportunities.
- Ensuring safety and healthy working conditions, eliminating threats and mitigating risks, protecting the health and safety of people staying on the company's premises.
- Conducting consultations and employee participation
- Continuous care for the natural environment, control of significant environmental aspects and prevention of environmental pollution.
- Cooperation with our customers in implementing solutions in our production process that allow us to save original raw material and use regranulate.

The values which are centralized in our company are :

- meeting applicable legal, OH&S, customers and ISO 45001 as well as ISO 13485 and IATF 16949 requirements;
- management of environmental aspects in accordance with the law and the standard ISO 14001:2015
- improving the environmental effects of operations as a result of continuous improvement;
- care for the environment through rational management to protect it for future generations.

We implement the adopted Policy by providing the necessary resources and involvement of management and employees, as part of the Integrated Management System based on the requirements of ISO 9001, ISO 14001, ISO 45001, IATF 16949, ISO 13485

**The assumptions of the Policy constitute an obligation towards our clients and are known and respected by all TMR Plastics employees**
